

GENERAL INFORMATION

Financers we currently use:

- At Luxor we believe in providing the best financing options to our reps exclusively. We, in turn, use Everbright for our PPA's and Concert for our loans only - as Everbright has the strongest financial backing in the industry and Concert has the lowest dealer fees.

Battery:

- Enphase 5P (\$5500 adder)
- SolarEdge 10KW (\$7,000 adder)

Markets we install in:

- The Entire State of California.

We are looking to open up AZ, NV, TX, and FL at the end of 2025

Dealers fees and interest rates:

- These are listed on the Rate Card Sheet

Adders:

- All adders are listed in our adder sheet
- We also do not have any hidden adders, like a lot of other installers do when they try to give you a “lower redline” to sway your volume over to them.

Material we use:

- Panels: Longi 425W
- Battery & Inverter: SolarEdge & Enphase

Pay Period:

- You will receive a text at M2 Funding about the commission on your account
- Your Dealer will receive a funding report on Fridays
- All pay is 80/20 (80% at M2 approved, 20% at M3 approved)

What we take the most pride in:

- At Luxor we believe in the fastest installs, best communication and top tier customer experience

Welcome to LUX!
